SEABOARD AIR LINE TO ISSUE \$300,000 MORTGAGE.
Directors Vets for Consolidation With Carolina, Atlantic and Western Railway.
New York, Oct. 7.—Directors of the Seaboard Air Line today adopted a plan providing for a consolidation with the Carolina, Atlantic and Western railway and an issue of a \$300,000 mortgage. This is in accordance with the company's policy of financial expansion and constructive extension announced some weeks ago.
As set forth in an announcement by S. D. Wardfield, chairman of the board, the consolidated company, to be known as the Seaboard Air Line Railway company, is to have an authorized capital stock of \$100,000,000, the same amount as was authorized by the present company, divided into 1,000,000 shares, par value \$100, of which there will be issued \$27,500,000 in preferred shares and \$72,500,000 in common shares.
New common stock is to be exchanged for the stock of the Carolina, Atlantic and Western railway. Of the \$27,500,000 preferred stock, \$2,500,000 will be exchanged for an equal amount of 5 per cent. 50-year cumulative bonds of the Carolina, Atlantic and Western railway, converting that issue into a preferred stock.
The \$25,000,000 stock to be exchanged for non-cumulative dividends of 6 per cent. The \$25,000,000 preferred stock is to be non-cumulative at 4 per cent. Dividends are declared on the common.
Under the new mortgage approximately \$25,000,000 30-year 6 per cent. bonds will be presently issued, of which approximately \$2,500,000 will be retained by the railway. Of the remainder, a part is to be used in exchange for underlying bonds of constituent companies.
C. H. BIRD TO SUPPORT M'CALL FOR GOVERNOR
Prominent Massachusetts Progressive to Work for Defeat of Democrats.
East Walpole, Mass., Oct. 7.—Charles Sumner Bird, candidate for governor on the progressive ticket in 1912 and 1913, and still a member of the national progressive party, announced today in a statement to the press that he is a republican candidate for governor. Former Congressman Samuel W. McCall, in a statement issued today, declared that he will support Bird in the republican platform. "I have never questioned his sincerity and I believe that he will keep his pledge."
Progressive measures advocated by Bird have been adopted by the republicans. Mr. Bird says, in his declaration for an executive budget, biennial elections, but I have never questioned his sincerity and I believe that he will keep his pledge.
The republican party of Massachusetts has been new light. The rank and file of the party are progressive and these men are as sincere as I am in their determination to carry out the platform which is fulfilled. Mr. McCall has promised to carry out these pledges. I have, in the past, looked upon Mr. McCall as a conservative, but I have never questioned his sincerity and I believe that he will keep his pledge.
Bird's statement is casting a vote this year will have in the fight between the democratic and the anti-democratic forces in this state. The fight must center around the national administration. Four more years of democratic misrule would mean the ruin of the country by the year 1920. Have the workers of Massachusetts and New England forgotten the ill effects of the large list of unemployed and the cheerless homes that followed the depression of 1914? The tariff and upon business. Every intelligent observer whose opinion is worth while knows that without war orders business would have collapsed long ago. The most awful depression that we have ever had.
When the United States was elected by most of the nations of the world. Today we are distressed and despised by practically all of the nations of the world. In our pursuit of wealth we have laughed at honor. We have failed at the making of implements of war while American citizens, men, women and children have been murdered in Mexico.
I am going to support Mr. McCall in this election. I am still a member of the national progressive party and shall continue such until the issue of 1916 determines the course of that party.

CONDITIONS IN CHINA SAME AS IN MEXICO
During the Diaz Regime, According to Dr. Frank Goodnow.
San Francisco, Cal., Oct. 7.—Conditions in China are much the same as they were in Mexico during the Diaz regime, according to Dr. Frank Goodnow, legal advisor to the republic of China, who arrived here today from Peking on the steamer Manchuria.
Dr. Goodnow plans to leave San Francisco tomorrow for Baltimore, to take up his duties as president of Johns Hopkins university.
With reference to his conditional recommendations that the monarchical form of government would be best for China, Dr. Goodnow believes that the new republic will be able to solve her own form of government without serious internal trouble if other nations adopt a "hands off" policy. Because of age, Yuan Shih Kai is eager to retire from the presidency as soon as possible if he can do so without hindering the progress of the country, according to Dr. Goodnow.
"President Yuan told me himself," said Dr. Goodnow, "that he would not be emperor if asked and that as president he would retire if he could do so with assurance that no trouble would follow."
Dr. Goodnow said a change from a republic to a monarchy could only be made successful if there was no opposition from the people and no objection from other nations.
SHERIFF AND 11 OTHERS INDICTED FOR MURDER.
Accused of Killing Gen. Pascual Orozco in Greene River Canyon.
Van Horn, Texas, Oct. 7.—The Culberson county grand jury today jointly indicted Sheriff John A. Morino and 11 other persons on a charge of murder in connection with the killing of General Pascual Orozco recently in Greene River canyon. The case is set for trial this week and the record is to be sent to the state department at Washington.
Although the board will enter upon its task with such facilities as are available at once, it will not be able actually to undertake the work contemplated by the plan, and its members until the research laboratory has been provided. The report adopted today recommends that a laboratory, building, structure, and equipment to cost approximately \$5,000,000 should be located on tide-water at sufficient depth to permit a dreadnought to come to the dock; that it should be near but not in a large city, so that supplies and labor might be obtained easily.
It proposes the construction of shops and foundries of various kinds, including picture developing, department mechanical and wireless and explosives laboratories and complete drafting rooms. Secrecy, the report says, should be a governing factor in such an establishment, the plant being surrounded with a high fence and a guard force, making it impossible to enter. It is estimated that the annual operating expenses of the laboratory should be between \$2,500,000 and \$3,500,000.
BRITISH ARE GAINING IN THE DARDANELLES.
Fighting is on a Scale Not to Call for Special Reports.
London, Oct. 7, 8:41 p. m.—During the past month of fighting in the Dardanelles the British have gained on an average something more than 300 yards all along the center of the four-mile Suvla bay front, according to an official statement given out tonight.
The statement was embodied in a report from General Sir Ian Hamilton as follows:
During the past month the fighting at Suvla bay has not been on a scale calling for special reports. Every night there have been patrol actions and bomb attacks and we gained an average of a little over 300 yards along the whole center of the four-mile Suvla front.
Argument For Western Railroads.
Washington, Oct. 7.—Counsel for western railroads and representatives of state railroad commissions today concluded argument before the interstate commerce commission on the proposed increase in passenger fares in western territory. The increase would amount to about one half cent per mile and the carriers estimate that their revenues would be increased between \$10,000,000 and \$17,000,000 per year.

The Reid & Hughes Co

6,000 ARMENIANS RESCUED BY FRENCH VESSELS
A Red Cross Flag Carried by the Refugees Was Seen by French Cruiser.
Boston, Oct. 7.—The American board of commerce today received a cablegram from Rev. S. V. Trowbridge, a former missionary of the board, now located at Cairo, reporting that 6,000 Armenian refugees had arrived at Port Said. The party included four mission congregations from villages in the vicinity of Antioch. For 60 days, the message stated, they defended their homes against violent Turkish attacks.
"During their flight they suffered greatly and their few supplies were soon exhausted. A Red Cross flag raised by a pastor was seen by a French cruiser which, with other vessels, rescued them. The survivors, mostly women and children, are utterly destitute and many are ill. British authorities are providing food and shelter, but more is needed for clothing and medicines. A local organization, including a nurse's committee, has been formed to care for the refugees and the American diplomatic agent has given this plan his approval."

3 Tests You Can Trust
A shotgun expert discovered three simple ways of testing the quality of shotgun shells.
These tests are made with a gun, a magazine, a glass of water, a pocket knife and a quarter dollar.
You keep the quarter. The tests cost nothing and they prove the points of superiority for

HAVE COLOR IN YOUR CHEEKS
So Better Looking—Take Olive Tablets.
If your skin is yellow—complexion pallid—tongue coated—appears poor—you have a bad taste in your mouth—a lacy, no-good feeling—you should take Olive Tablets.
Dr. Edwards' Olive Tablets—a substitute for calomel—were prepared by Dr. Edwards after 17 years of study with his patients.
Dr. Edwards' Olive Tablets are a purely vegetable compound mixed with olive oil. You will know them by their olive color.
If you want a clear, pink skin, bright eyes and a plump, a feeling of buoyancy like childhood days, you must get at the cause.
Dr. Edwards' Olive Tablets act on the liver and bowels like calomel, yet have no dangerous after effects. They start the bile and overcome constipation. That's why millions of boxes are sold annually at 10c and 25c per box. All druggists.
Take one or two nightly and note the pleasing results.

TO SCRUTINIZE STEEL COMBINATION

Attorney General McGregor Announces That Department of Justice Will Closely Follow Combine of Independent Companies.

New York, Oct. 7.—The announcement in Washington by Attorney General Gregory that the department of justice would closely scrutinize any attempt to organize a combination of independent steel companies around the greatest interest today in financial and steel circles, inasmuch as the state follows closely upon the announcement of the organization of the Midvale Steel and Ordnance company, a \$100,000,000 corporation, which has brought together four concerns.
At the same time negotiations are pending for a combination between the Bethlehem Steel corporation and the Pennsylvania Steel company which may become the nucleus for another combination equal to and possibly larger than the Midvale merger, and insistent rumors are in circulation that both these combinations have still more ambitious plans. Neither of them, it was pointed out today, either alone or together, would approximate the size of the United States Steel corporation, several other large steel companies, which have not been mentioned as possible components, were to be included, such as the Republic Iron and Steel company and the Jones & Loughlin company.
None of the companies now in the Midvale combination are competing companies, according to William E. Corey, organizer of the company. He expressed the opinion, however, that any combination between his company and the Bethlehem-Pennsylvania interests would probably not be legal, as they would bring together competing concerns.
Gossip in Wall street today was that the two combinations would be found to be active competitors in the ordnance and war munitions business, not only for European war contracts, but for United States government contracts, growing out of the new plans for national defense.
Charles M. Schwab, head of the Bethlehem Steel company, was out of town today and no authoritative information could be obtained as to the progress of the negotiations for acquisition of the Pennsylvania.
Rumors were current that the Crucible Steel company and an American steamship company, to be used for carrying ores from the Bethlehem properties in Chile, were to be a part in this combination.
Fall River Weavers Return to Work.
Fall River, Mass., Oct. 7.—Three hundred weavers employed by the Laurel Lake mill, who went on strike here last week because of alleged unsanitary working conditions, voted today to return to work next Monday. The strike committee reported that the management had made concessions. More than 600 operatives were forced out on account of the strike, as the plant had been closed since Monday.
Bishop Codman Dead.
Boston, Oct. 7.—The Rt. Rev. Robert Codman, bishop of the Episcopal diocese of Maine, died at a hospital here today. He had been unconscious since an operation several days ago.
East Hampton—A meeting of St. Rita's Girls' Temperance society was held on Thursday evening when the officers were installed by County Director Grippo, of Middletown.

EXPERIMENTAL LABORATORY TO COST \$5,000,000.

Proposed in Resolution Adopted by Naval Advisory Board.
Washington, Oct. 7.—Organization of the navy's new civilian advisory board here today with Thomas A. Edison as chairman was followed by the adoption of a resolution proposing establishment of a great research and experimental laboratory to cost about \$5,000,000. The recommendation probably will be included in Secretary Daniels' estimates to be sent to congress this winter.
The "naval consulting board" is the official title chosen for the advisory board which will be composed of the navy with the approval of Secretary Daniels. It was announced that regular meetings would be held every six days, the next to take place in New York, December 8.
Two sessions were held today, the first devoted to organization and election of officers and the second to consideration of the research laboratory plant which, after being proposed by Secretary Daniels, was framed into an elaborate report by Mr. Edison, assisted by Dr. W. R. Whitney, Dr. L. H. Backeland, R. S. Woodward and H. E. Coffin.
Mr. Daniels was host at luncheon at the army and navy club, during which a sub-committee submitted a report for the consideration of the board. The sub-committee, consisting of three scientists and inventors into committees or groups for the study of specific problems. It was decided that there should be committees on chemistry and physics, aeronautics, including internal combustion, motors, electricity, standardization, torpedoes, and mines, submarines, ordnance and explosives, wireless and communication, transportation, production and manufacture, ship construction, steam engineering and ship propulsion, life saving appliances, food and sanitation and aid to the merchant marine.
The committees will have been appointed by the time of the next meeting of the board, and they have as members experts in the subjects with which it will deal.
Although the board will enter upon its task with such facilities as are available at once, it will not be able actually to undertake the work contemplated by the plan, and its members until the research laboratory has been provided. The report adopted today recommends that a laboratory, building, structure, and equipment to cost approximately \$5,000,000 should be located on tide-water at sufficient depth to permit a dreadnought to come to the dock; that it should be near but not in a large city, so that supplies and labor might be obtained easily.
It proposes the construction of shops and foundries of various kinds, including picture developing, department mechanical and wireless and explosives laboratories and complete drafting rooms. Secrecy, the report says, should be a governing factor in such an establishment, the plant being surrounded with a high fence and a guard force, making it impossible to enter. It is estimated that the annual operating expenses of the laboratory should be between \$2,500,000 and \$3,500,000.

BRITISH ARE GAINING IN THE DARDANELLES.
Fighting is on a Scale Not to Call for Special Reports.
London, Oct. 7, 8:41 p. m.—During the past month of fighting in the Dardanelles the British have gained on an average something more than 300 yards all along the center of the four-mile Suvla bay front, according to an official statement given out tonight.
The statement was embodied in a report from General Sir Ian Hamilton as follows:
During the past month the fighting at Suvla bay has not been on a scale calling for special reports. Every night there have been patrol actions and bomb attacks and we gained an average of a little over 300 yards along the whole center of the four-mile Suvla front.

Argument For Western Railroads.
Washington, Oct. 7.—Counsel for western railroads and representatives of state railroad commissions today concluded argument before the interstate commerce commission on the proposed increase in passenger fares in western territory. The increase would amount to about one half cent per mile and the carriers estimate that their revenues would be increased between \$10,000,000 and \$17,000,000 per year.

BRITISH SOLDIERS TAKEN PRISONERS LOOKED TIRED.
Berlin Says They Complained of the Inefficiency of Their Officers.
Berlin, Oct. 7. (By Wireless to Tuckerton, N. J.)—"Reports from the western front," says the Overseas News agency, "state that British soldiers who were taken prisoner were tired looking, undisciplined and complained that they were inefficient. Many of them declared they had been forced to enter the army because they were unemployed and that they would lose their jobs if they did not enlist. They say that they had only been drilled in marching before leaving England and that some of them had fired their first shots after going into the trenches, their drilling having been conducted with wooden rifles."
"All of them declared that they knew nothing of the impending battle from the beginning. Their losses had been fearful, they said, the whole front of their army having been broken up by the German machine guns."
The only prisoners taken who made a good impression upon their captors were the non-commissioned officers.

LAWSON ADMITTED TO BAIL IN THE SUM OF \$35,000.
Colorado Miner Who Got Life Sentence for Murder of Sheriff.
Denver, Col., Oct. 7.—The Colorado supreme court today admitted John R. Lawson to bail in the sum of \$35,000. Lawson had been convicted of first degree murder in connection with the killing of Sheriff John H. Lawson in a riot near Ludlow in October, 1913. The supreme court several weeks ago granted a supersedeas and writ of error. The question of admitting Lawson to bail was left undecided until today.
Lawson was a member of the international executive board of the United Mine Workers of America and was a member of the poll committee of the union throughout the strike.
Lawson is in jail in Trinidad, where he was imprisoned last summer after Judge Granby Hillier denied him motion for a new trial. Judge Hillier since has been barred by the supreme court from presiding at future trials.

New Britain—Mayor George A. Quayley will speak to the students at the New Britain high school today (Friday) on Fire Prevention day.

Margaret Wilson and her cousin, Miss Hopes, drew Mrs. Galt into the White House circle.
